STANDARD-SPECIFIC ASSESSMENT RULE

Keep organizational and product claims distinct. Verify boundaries, functional units, due-diligence evidence, indicator calculations and critical requirements. Treat draft pilot comparison values as draft criteria.

HOW TO COMPLETE EACH CHECK

Pass	All applicable source conditions are met by identified evidence.
Fail	An applicable requirement or required protective gate is not met.
Not demonstrated	Evidence is absent, incomplete, invalid or inconclusive; this is not a pass.
Not applicable	The trigger is absent and the rationale and reviewer are recorded.

Source schedules, methods and record templates are assessed for correct application. For adverse conditions, verify prevention or effective closure. Do not treat illustrative values as mandatory limits. No result is preselected and no overall result is calculated.

Requirement map

Checklist identifiers are workbook record numbers. Source clause numbers, native requirement IDs and PDF page references are preserved separately. Several records may address one source clause.

CONTROLLED SOURCE

IAF_Automotive_Sustainability_First_Edition_Corporate(1).pdf

Working Draft 0.3

Source length: 47 pages. Checklist revision: 1.0, dated 15 September 2026.

SOURCE SHA-256

426f9a6d1acf263d9723512fb7e15da2bedacc2aaacfab52fb3eafd45238c0ae

INTERPRETATION AND COVERAGE

This workbook reproduces source requirement text and source schedule entries as assessment criteria. Long clauses and schedules may have several separately numbered check records. A clause is not complete until every applicable record and required source condition has been dispositioned.

Read each record with its complete source clause, definitions, referenced methods, numerical rules and applicability conditions. The source document controls if an extraction, layout or interpretation issue is found. Record the discrepancy and resolve it before a positive conclusion.

Normative annexes in the source are included where applicable. Informative annexes are reading aids and do not independently create conformity obligations. Context-only main clauses and definitions without assessment duties are read with the requirements.

Assign responsibility for each applicable record in the controlled applicability register. Duties addressed to IAF or an assessment body must be reviewed against that role. They are not automatically duties of a manufacturer, operator or other applicant.

Record document/test IDs, revision, sample/configuration, measured result and limit where relevant. Explain every Fail, Not demonstrated and Not applicable result. Add a finding ID for any required action.

Text areas are sized for concise entries and limit input to reduce hidden content. Use the continuation sheet or an identified external evidence record for longer notes. Save a local copy, reopen it and check entered values before issuing the completed workbook.

Every Fail or unresolved critical gate requires the relevant scope to remain blocked. An observation is not a substitute for a failed requirement. A positive pilot conclusion is not certification, a product authorization or permission to use an IAF mark.

INFORMATIVE READING SUPPORT

Annex G, Annex H

Requirements & evidence

1 | Purpose and scope

CHECK 0001 | 1.1

Source p. 5

Purpose and scope

The organization shall establish evidence of the environmental, social, governance and economic sustainability impacts associated with the activities and products included in its assessment scope. It shall measure relevant impacts, prevent harm to people and ecosystems, fulfil its obligations, control significant risks and implement a documented improvement programme.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0002 | 1.3

Source p. 5

Purpose and scope

Passenger cars, commercial vehicles, buses, motorcycles, trailers and special purpose road vehicles may be assessed. Product comparisons shall be restricted to an approved vehicle or product category profile. Annex C supplies a provisional passenger car profile for piloting; other categories require a separately approved profile before comparative conclusions.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0003 | 1.4

Source p. 5

Purpose and scope

The environmental boundary shall address raw material extraction and processing, component production, vehicle assembly, distribution, energy supply, use, maintenance, replacement, collection and final treatment where relevant. A partial boundary shall be clearly named and shall not be described as a complete life cycle result.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0004 | 1.5

Source p. 5

Purpose and scope

The standard shall be applied without assigning an automatic advantage to a propulsion technology. Battery electric, hybrid, combustion and fuel cell vehicles shall be assessed using their actual relevant energy chains, emissions and material burdens. A technology name is not evidence of environmental performance.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0005 | 1.6

Source p. 5

Purpose and scope

The scope includes environmental stewardship, human rights, decent work, health and safety, communities, responsible products and technology, ethical governance, sustainable procurement, economic resilience and transparent performance reporting. The organization shall apply the common requirements and evaluate emerging topics through Clause 20; a topic not named explicitly shall not be omitted if it creates a significant sustainability impact.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0006 | 1.7

Source p. 5

Purpose and scope

This standard provides an integrated requirements framework for automotive sustainability. It does not replace every specialized technical standard, statutory approval or professional assessment that a particular activity requires. Those instruments shall be identified and applied through the controlled method and legal registers.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

2 | Normative conventions and method control

CHECK 0007 | 2.1

Source p. 5

Normative conventions and method control

"Shall" indicates a requirement, "should" a recommendation and "may" a permitted option. Notes and informative annexes do not create requirements. A requirement is applicable unless its stated condition is absent and the exclusion is accepted under Clause 4.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0008 | 2.2

Source p. 5

Normative conventions and method control

The organization shall maintain a controlled method register giving the method title, responsible owner, version, amendments, system boundary and permitted use of each calculation or testing method. The complete approved method shall be available to the competent personnel applying it.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0009 | 2.3

Source p. 6

Normative conventions and method control

The assessment plan shall fix the applicable method editions before evidence is evaluated. Recognized public or licensed methods may be used where technically appropriate. An alternative method shall demonstrate equivalence of measurand, sampling, conditions, uncertainty and decision outcome before it is accepted. Similar titles or units alone do not establish equivalence.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0010 | 2.4

Source p. 6

Normative conventions and method control

The order of precedence shall be applicable law, this standard for voluntary requirements that do not conflict with law, the approved category profile, and the agreed test plan. A legal conflict shall be recorded and referred to the scheme owner. The assessor shall not issue a positive conclusion for a conflicting requirement by silently omitting it.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0011 | 2.5

Source p. 6

Normative conventions and method control

A draft method shall be used only for explicitly identified research or pilot evidence. It shall not be represented as a final approved method. Changes to methods or legal instruments shall be evaluated through controlled impact review rather than automatic incorporation.

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

3 | Terms and definitions

CHECK 0012 | 3 | part 1/2

Source p. 6-7

Terms and definitions

For this document, the following meanings apply. Assessment object: the specifically identified organization, facility, product family, vehicle configuration, component, batch or service to which a conclusion applies. Corporate inventory: emissions attributed to an organization within a stated consolidation boundary and reporting period. It is distinct from the footprint of an individual product. Product carbon footprint: greenhouse gas emissions and removals associated with a defined product boundary and reference flow, expressed as carbon dioxide equivalent using a declared characterization basis. Functional unit: a quantified service used as the basis for comparing product systems. A declared unit describes a quantity of product without necessarily specifying the same delivered service. Primary data: measured or calculated activity information from the actual process or supply chain under study. A supplier name on an estimate does not by itself make all underlying data primary. Secondary data: information obtained from representative databases, published factors, proxies or other processes. Its geography, technology and age shall be disclosed. Critical requirement: an obligation whose failure prevents a positive conformity decision for the affected scope, regardless of performance elsewhere. Gross emissions: emissions before subtraction of offsets, avoided emissions or separately reported out of boundary benefits. Biogenic flows and removals shall remain separately identifiable. Recycled content: material recovered from waste and incorporated into a product under the definitions and boundary of Clause 15. Reuse, remanufacturing and energy recovery are reported separately. Non exhaust emissions: particles or material released through processes such as brake wear and tyre abrasion. Tyre mass loss is not interchangeable with airborne particulate emissions. Sustainability record: a versioned collection of product or organizational indicators, scope information, methods, evidence references and assessment status. It does not itself constitute a statutory product passport.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0013 | 3 | part 2/2

Source p. 7

Terms and definitions

Significant change: a change that could alter an applicable requirement, declared value, environmental claim, uncertainty range or validity of the assessment evidence. Verified improvement: a demonstrated reduction in a named impact compared with an identified baseline under compatible boundaries and methods, after considering uncertainty and adverse changes in other significant impacts. Sustainability assessment: evaluation of the applicable environmental, social, governance and economic resilience requirements for a defined automotive object and scope. It is not a declaration that all impacts are positive or that future performance is guaranteed. Due diligence: an ongoing process to identify, prevent and mitigate adverse impacts, track action, communicate relevant results and support appropriate remedy according to the organization's relationship to the harm. Circularity: retaining the function and value of products and materials while reducing resource demand and waste through durability, repair, reuse, remanufacture and appropriate recycling. Energy recovery is reported separately from material circulation. Living wage: an assessed level of normal working time earnings supporting a decent standard of living for workers and their families in a defined locality, using a stated credible method and assumptions. It is distinct from a statutory minimum wage. Material topic: an issue significant because of the organization's effects on people or the environment, or because of sustainability related risks or opportunities for its continued operation. One perspective does not erase the other. Just transition: management of technological, environmental and business changes with attention to workers' rights, skills, livelihoods and affected communities.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

4 | Assessment objects and applicability

CHECK 0014 | 4.1

Source p. 7

Assessment objects and applicability

The applicant shall specify legal entities, sites, product identifiers, production years or batches, technologies, markets and reporting periods. The scope shall identify outsourced processes and the activities over which the applicant has control or influence.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0015 | 4.2

Source p. 7

Assessment objects and applicability

Four assessment routes shall be distinguished: organization and facility; vehicle and component; mobility and logistics service; and recovery and recycling operation. Each route shall apply the common requirements and relevant technical modules in Annex A.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0016 | 4.3

Source p. 7

Assessment objects and applicability

A vehicle application shall identify powertrain, battery chemistry and capacity, mass, body configuration, tyres, emissions controls and software versions that affect results. A family grouping shall identify all variants and explain how selected configurations represent both expected use and the highest relevant burdens.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0017 | 4.4

Source p. 8

Assessment objects and applicability

Exclusions shall state the absent activity or impact, evidence supporting absence and effect on the conclusion. Missing measurements, unavailable suppliers, cost or poor performance shall not justify "not applicable." Missing information shall be identified as a data gap and treated under Clause 8.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0018 | 4.5

Source p. 8

Assessment objects and applicability

A positive facility assessment shall not extend to all products made at that facility. A component statement shall not imply a whole vehicle statement. An organizational assessment covering selected subsidiaries shall not use language implying group wide coverage.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0019 | 4.6

Source p. 8

Assessment objects and applicability

A statement of conformity to this complete standard shall cover every common requirement and all applicable activity requirements. An assessment limited to lifecycle carbon, circularity or another module may issue a clearly identified partial verification statement, but shall not claim conformity to the complete standard. Materiality shall not be used to exclude fundamental safeguards.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0020 | 4.7

Source p. 8

Assessment objects and applicability

For a product route, social and governance controls shall cover the applicant and the operations and relationships relevant to that product. The assessor shall identify the sites and supplier due diligence evaluated and limitations in upstream visibility. A product statement shall not imply that every remote supplier has received a full site audit.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

5 | Governance and safeguards

CHECK 0021 | 5.1

Source p. 8

Governance and safeguards

Top management shall appoint an accountable owner with authority to obtain data, commission tests, investigate deviations and fund corrective action across environmental, social, governance and resilience topics. Responsibilities for measurements, calculations, purchasing controls and public claims shall be documented.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0022 | 5.2

Source p. 8

Governance and safeguards

Personnel shall demonstrate competence for assigned tasks. Competence records shall include relevant training, practical experience and evaluation of work. Financial incentives shall not depend on obtaining a favourable test result or conformity decision.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0023 | 5.3

Source p. 8

Governance and safeguards

The organization shall prohibit falsification, selective suppression of results, undeclared test specific vehicle behaviour, deliberate pollution bypass and fraudulent environmental attributes. Credible allegations shall be investigated independently of personnel implicated in the allegation.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0024 | 5.4

Source p. 8

Governance and safeguards

Environmental improvements shall not rely on forced labour, unlawful child labour, deliberate concealment of serious worker hazards or unlawful disposal. Confirmed severe abuses linked to the assessed scope shall trigger containment and remedy. Relevant critical failures shall prevent a positive conclusion until corrective measures and their effectiveness have been verified.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0025 | 5.5

Source p. 8

Governance and safeguards

Workers, suppliers and affected communities shall have an accessible reporting route. Retaliation shall be prohibited. Confidentiality and lawful data protection shall be maintained, while assessors shall retain access to evidence necessary for their conclusions.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

6 | Legal obligations and market profiles

CHECK 0026 | 6.1

Source p. 8

Legal obligations and market profiles

The organization shall maintain a register of environmental, employment, human rights, product, governance and reporting obligations applicable to its sites, activities and intended markets. Each entry shall identify jurisdiction, vehicle or product category, legal instrument, current amendment, effective date, relevant limit or obligation, required method and evidence of fulfilment.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0027 | 6.2

Source p. 9

Legal obligations and market profiles

The register shall cover applicable exhaust and evaporative emissions, energy or carbon requirements, battery obligations, chemical restrictions, waste, water discharges, air permits, noise, end of life responsibilities and environmental marketing requirements. Applicability shall be checked against the actual regulated object.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0028 | 6.3

Source p. 9

Legal obligations and market profiles

Regional market profiles shall be maintained separately for every intended country, region and relevant subnational jurisdiction. A profile shall be created for each intended market; limits, obligations and implementation conditions shall not be assumed to be identical across markets.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0029 | 6.4

Source p. 9

Legal obligations and market profiles

A limit shall be taken from an effective authoritative legal text together with its vehicle class, fuel, unit, procedure and implementation conditions. Values from different test cycles or vehicle categories shall not be combined into a single global limit. Proposed laws shall be labelled as proposals.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0030 | 6.5

Source p. 9

Legal obligations and market profiles

Evidence of material unresolved legal noncompliance affecting the scope shall block a positive conformity statement. Corrective action plans do not substitute for required permits or product approvals. Where an authority is investigating a credible issue, the assessor shall assess whether sufficient evidence exists to support any conclusion and shall restrict or suspend claims if it does not.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0031 | 6.6

Source p. 9

Legal obligations and market profiles

The legal register shall also cover applicable employment, working time, occupational safety, equal treatment, community and land rights, privacy, cybersecurity, anti corruption, competition, tax and reporting obligations. The organization shall apply stricter voluntary IAF protections where lawful. A conflict with mandatory law shall be escalated, documented and reflected in the assessment conclusion; a generic legal compliance declaration shall not conceal that conflict.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

7 | Environmental significance and objectives

CHECK 0032 | 7.1

Source p. 9

Environmental significance and objectives

The organization shall identify significant impacts using magnitude, severity, likelihood, affected communities, ecological sensitivity, legal exposure and life cycle contribution. A low carbon contribution shall not remove a toxic, persistent or unlawful release from consideration.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0033 | 7.2

Source p. 9

Environmental significance and objectives

Objectives shall include an absolute gross greenhouse gas objective for controlled operations and objectives for significant value chain impacts. Intensity metrics shall be reported alongside absolute totals where relevant. Growth, acquisitions, outsourcing and product mix changes shall be explained.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0034 | 7.3

Source p. 9

Environmental significance and objectives

Each objective shall identify its baseline, boundary, quantitative endpoint, milestone dates, responsible owner, funded measures and method of tracking progress. Objectives described as science based or aligned with a temperature pathway shall identify the pathway, model version, coverage and evidence supporting that description.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0035 | 7.4

Source p. 9

Environmental significance and objectives

At least annually, management shall evaluate measured results, missed milestones, adverse tradeoffs, customer feedback and emerging technologies. Any target revision shall preserve the original target history and explain the change. A weaker target shall not be presented as achieved improvement.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0036 | 7.5

Source p. 9

Environmental significance and objectives

The standard does not prescribe an unvalidated universal reduction percentage for all automotive activities. Demonstrated achievement of an applicant's target shall not be called best in class without an independently substantiated comparison.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0037 | 7.6

Source p. 9-10

Environmental significance and objectives

The sustainability programme shall also establish objectives and actions for material social and governance impacts and economic resilience. Fundamental rights and critical safeguards shall be implemented regardless of whether management has selected a numerical target for them. Climate targets and charitable activity shall not substitute for required action in these areas.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0039 | 8.2

Source p. 10

Data quality and traceability

The organization shall prioritize measured process data and traceable supplier information for significant contributors. Proxy selection shall document technical and geographic relevance. Missing data shall not be entered as zero.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0040 | 8.3

Source p. 10

Data quality and traceability

The minimum data controls in Annex B shall apply. The assessor shall distinguish completeness of the inventory, coverage by primary data and certainty of the result. A high primary data percentage does not by itself establish accuracy or absence of bias.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0041 | 8.4

Source p. 10

Data quality and traceability

Mass, energy, purchasing, production and waste records shall be reconciled. Differences shall be investigated rather than allocated to an unexplained residual. Units and reference conditions shall be harmonized before aggregation.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0042 | 8.5

Source p. 10

Data quality and traceability

Uncertainty assessment shall address instrument performance, sampling variation, model parameters, allocation and representativeness. Results shall state an interval or justified range. A modelled scenario range shall not be described as a statistical confidence interval.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0043 | 8.6

Source p. 10

Data quality and traceability

Records supporting a claim shall be retained for the entire period of the claim and at least five years after its last use, or longer where law requires. Confidential supplier data may be held in a controlled repository if the independent assessor can inspect sufficient underlying evidence.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0044 | 8.7

Source p. 10

Data quality and traceability

Social and governance data shall be supported by the evidence and sampling controls in Annexes I and J. Statistical uncertainty, incomplete records and limits of interview or site coverage shall be stated in a form appropriate to the evidence. Confidentiality shall not be used to conceal material findings, but public disclosure shall protect personal data and affected people.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0045 | 8.8

Source p. 10

Data quality and traceability

Retention under 8.6 shall be applied with the personal data controls in Annex J. The organization shall retain sufficient evidence of decisions and outcomes without retaining unnecessary identifiable worker or community information.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

9 | Organizational greenhouse gas inventory

CHECK 0046 | 9.1

Source p. 10

Organizational greenhouse gas inventory

The organization shall define a consistent consolidation approach and identify direct emissions, purchased energy emissions and relevant other value chain emissions. Inventory categories shall remain separately visible; product footprints shall not be added to corporate totals without boundary reconciliation.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0047 | 9.2

Source p. 10

Organizational greenhouse gas inventory

The inventory shall address relevant greenhouse gases, process emissions, refrigerants, purchased materials, energy supply, transport, capital goods, waste and the use and treatment of sold products. All value chain categories in the selected accounting method shall be screened and every exclusion justified.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0048 | 9.3

Source p. 11

Organizational greenhouse gas inventory

Greenhouse gas results shall identify the global warming potential source, assessment version and time horizon. Different characterization versions shall not be mixed within a reported total without reconciliation. Biogenic carbon, land use effects and removals shall be separately disclosed where relevant.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0049 | 9.4

Requirements & evidence

CHECK 0070 | 12.6

Source p. 13

Vehicle energy and exhaust emissions

Emissions control functions shall be effective in the declared operating envelope. Undeclared test recognition, manipulation or suppression of unfavourable runs shall be prohibited. All valid runs shall be retained; every invalidated run shall have a technical reason unrelated to whether its result is favourable.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0071 | 12.7

Source p. 13

Vehicle energy and exhaust emissions

The organization shall evaluate deterioration of energy efficiency and emissions controls over the declared service life. Evidence shall identify aged components, accelerated ageing assumptions and field data. An extrapolation shall not be described as an observed lifetime result.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

13 | Non exhaust emissions and noise

CHECK 0072 | 13.1

Source p. 13

Non exhaust emissions and noise

The assessment shall address brake particles, tyre abrasion and relevant noise across all propulsion technologies. Selection of low resistance tyres or reduced friction materials shall not override required braking, grip, load, durability or safety performance.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0073 | 13.2

Source p. 13

Non exhaust emissions and noise

Brake evidence shall identify friction material, disc or drum, conditioning, braking cycle, temperature, ventilation, measurement size fractions and the basis for conversion from one brake to the vehicle. Regenerative braking credit shall use a reproducible allocation of friction braking under the declared duty conditions, including low battery acceptance and emergency operation where relevant.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0074 | 13.3

Source p. 13

Non exhaust emissions and noise

Tyre evidence shall identify tyre model, size, load, pressure, alignment, road or drum method, environmental conditions, distance and measured mass loss. Abrasion results shall state whether they represent total material loss or collected airborne particles. Road dust resuspension shall be reported separately if included.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0075 | 13.4

Source p. 13

Non exhaust emissions and noise

Where a suitable standardized method is unavailable, an approved research method may supply labelled pilot data. The test plan shall define validation, repeatability and uncertainty. Such data shall not receive a regulatory compliance conclusion or an unsupported "low particle" performance designation.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0076 | 13.5

Source p. 13

Non exhaust emissions and noise

Vehicle pass by noise and facility or service noise shall use applicable methods and boundaries. Required acoustic warning systems shall remain functional. Noise levels measured under different distances, surfaces or operating conditions shall not be ranked without a justified common basis.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

14 | Batteries and energy carriers

CHECK 0077 | 14.1

Source p. 13

Batteries and energy carriers

Traction battery evidence shall identify chemistry, cell and pack production locations where traceable, capacity definition, pack mass, manufacturing footprint, critical material sources, safety relevant repair restrictions and collection route. Pack level and cell level values shall not be interchanged.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0078 | 14.2

Source p. 14

Batteries and energy carriers

Battery footprint shall be reported per pack and per unit of rated energy capacity under a specified test and capacity basis. A value per lifetime energy throughput may be added only with a documented durability and utilization model. It shall not replace the manufacturing value.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0079 | 14.3

Source p. 14

Batteries and energy carriers

Durability evaluation shall address capacity and power retention, calendar ageing, cycle ageing, temperature, charging rate and relevant usage limits. State of health algorithms shall be validated against physical measurements and version controlled. Warranty terms alone shall not establish actual durability.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0080 | 14.4

Source p. 14

Batteries and energy carriers

Replacement assumptions shall include realistic failure and degradation scenarios. Changing to a larger replacement pack shall account for its additional production burden. Reuse and second life claims shall identify the receiving application, remaining service capability and allocation rules; a possible second life shall not automatically reduce the first vehicle's footprint.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0081 | 14.5

Source p. 14

Batteries and energy carriers

Hydrogen declarations shall identify production pathway, electricity and feedstock sources, upstream methane where relevant, compression or liquefaction, transport and measured or modelled leakage. A fuel colour designation shall not substitute for quantified supply chain evidence.

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

15 | Circularity and responsible materials

CHECK 0084 | 15.1

Source p. 14

Circularity and responsible materials

The organization shall maintain a material inventory covering major metals, polymers, elastomers, glass, fluids, electronics and other significant substances. Material composition and supplier declarations shall be traceable to the assessed configuration or batch.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0085 | 15.2

Source p. 14

Circularity and responsible materials

Recycled content shall distinguish post consumer and pre consumer material. Pre consumer material shall exclude rework, regrind or scrap capable of recovery within the same generating process. Reused parts and remanufactured assemblies shall be disclosed separately.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0086 | 15.3

Source p. 14

Circularity and responsible materials

Physical recycled content shall be supported by material flow and chain of custody records. A mass balance allocation claim shall disclose the accounting model, site boundary, period and independently controlled allocation. It shall not be described as the physical recycled percentage of an individual vehicle unless that physical content is established.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0087 | 15.4

Source p. 14

Circularity and responsible materials

Recyclability by design shall identify dismantling steps, separation technology, contaminant constraints and assumed receiving infrastructure. Actual recovery rates shall be based on measured downstream outputs. Theoretical technical recyclability shall not be marketed as an achieved recycling rate.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0088 | 15.5

Source p. 14

Circularity and responsible materials

Design reviews shall evaluate material efficiency, durability, modular replacement, disassembly, adhesives, fasteners and material compatibility. A change shall document effects on safety, life cycle burdens and repair cost. Lower vehicle mass alone shall not establish a lower total footprint.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0089 | 15.6

Source p. 15

Circularity and responsible materials

Chemical controls shall address applicable restrictions and significant substances of concern. The organization shall maintain supplier change controls and risk based analytical checks. Substitution shall consider hazard and exposure so that a restricted material is not replaced by an equally serious unmanaged hazard.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0090 | 15.7

Source p. 15

Circularity and responsible materials

Circularity planning shall prioritize feasible prevention of unnecessary material demand and retention of useful service before treatment of waste. Design and business model decisions shall evaluate repair, reuse, remanufacture and recycling, including reverse logistics and demand for recovered outputs. An improvement in a material circulation indicator shall be checked against lifecycle carbon, toxicity, safety and social impacts.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0091 | 15.8

Source p. 15

Circularity and responsible materials

Packaging and auxiliary materials shall be assessed for avoidable consumption, reuse cycles, transport burden, contamination and recovery infrastructure. Reusable packaging claims shall use evidenced or clearly modelled reuse and return rates. Hazardous transport protection shall not be removed to improve a packaging reduction figure.

Requirements & evidence

20 | Materiality and stakeholder engagement

CHECK 0118 | 20.1

Source p. 17

Materiality and stakeholder engagement

The organization shall assess its actual and potential effects on people, society and the environment, and the sustainability related risks and opportunities affecting its ability to operate and deliver its commitments. These two perspectives shall be recorded separately before priorities are combined. A risk to people shall not be excluded because its financial effect on the organization is small.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0119 | 20.2

Source p. 17-18

Materiality and stakeholder engagement

The assessment shall cover its own operations, products, services and business relationships across the value chain. It shall consider workers and contractors, suppliers, customers, vehicle users, vulnerable road users, local communities, public authorities and other materially affected interests. Stakeholder identification shall not be limited to parties with commercial purchasing power.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0120 | 20.3

Source p. 18

Materiality and stakeholder engagement

Adverse impacts shall be evaluated for severity, scale, extent, reversibility and likelihood where relevant. For potential severe human rights impacts, severity shall take precedence over ease of quantification. Positive impacts shall be described separately and shall not cancel an adverse impact in the prioritization process.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0121 | 20.4

Source p. 18

Materiality and stakeholder engagement

Stakeholder engagement shall use accessible languages and safe channels, allow differing views and record how input affected decisions. The organization shall use independent or representative input when direct contact would create risk. Stakeholder consent to participate shall not be treated as consent to waive rights or accept an impact.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0122 | 20.5

Source p. 18

Materiality and stakeholder engagement

The materiality record in Annex J shall identify the issue, affected parties, value chain location, evidence, priority, uncertainty, responsible owner and action. Management shall approve the record and review it at least annually and after a major product, operational, sourcing or societal change.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0123 | 20.6

Source p. 18

Materiality and stakeholder engagement

Materiality determines additional effort and priorities; it shall not remove the common requirements in Annex A. Human rights, lawful employment, safety, ethical conduct, truthful disclosure and legal compliance shall remain mandatory. Lack of complaints or lack of historical data shall not establish absence of an impact.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

21 | Human rights due diligence and remedy

CHECK 0124 | 21.1

Source p. 18

Human rights due diligence and remedy

The organization shall adopt a public commitment to respect internationally recognized human rights within its operations and business relationships. It shall translate that commitment into responsibilities, purchasing decisions, operating controls and access to remedy. The policy shall include people affected by operations as well as people employed by the organization.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0125 | 21.2

Source p. 18

Human rights due diligence and remedy

Due diligence shall identify whether the organization causes, contributes to, or is directly linked through a business relationship to an adverse impact. The response shall reflect that relationship and the severity of the impact. An organization that causes or contributes to harm shall provide or cooperate in remedy; one linked through a relationship shall use its influence to prevent and mitigate the harm and evaluate further action.

RESULT FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0126 | 21.3

Source p. 18

Human rights due diligence and remedy

Risk analysis shall examine extraction, processing, logistics, manufacturing, security arrangements and end of life activities where relevant. Conflict affected locations, migrant recruitment, informal recycling and opaque subcontracting shall receive enhanced attention. A country risk score shall support investigation, not replace specific evidence or automatically prove abuse.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0127 | 21.4

Source p. 18

Human rights due diligence and remedy

The organization shall maintain a process for complaints that is accessible, predictable, fair and protective against retaliation. It shall permit confidential reporting, explain handling steps and communicate progress to complainants where safe. The process shall not require waiver of judicial, collective bargaining or other lawful avenues of remedy.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0128 | 21.5

Source p. 18-19

Human rights due diligence and remedy

Remedy shall be appropriate to the harm and developed with affected people where practicable. Examples may include repayment, restoration of employment rights, medical or livelihood support, environmental restoration and measures preventing recurrence. Donations unrelated to the harm shall not count as remedy.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0129 | 21.6

Source p. 19

Human rights due diligence and remedy

For severe ongoing impacts, the organization shall take prompt protective action and escalate decisions to accountable management. Ending a contract shall not automatically close responsibility for contributed harm. Responsible disengagement shall assess consequences for affected people, preserve remedy obligations and document the rationale.

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0301 | B2

Source p. 35

Required indicators and calculations

Calculate greenhouse gas emissions by multiplying each activity quantity by a factor with a compatible unit and boundary, then aggregating the relevant contributions. Where gas specific factors are used, convert each gas with the declared global warming potential. A factor already expressed as CO₂e shall not be characterized again.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0302 | B3

Source p. 35

Required indicators and calculations

Calculate life cycle impact per vehicle kilometre by dividing the complete vehicle life cycle total in kilograms CO₂e by lifetime distance in kilometres and multiplying by one thousand. Production, use, maintenance and final treatment totals shall remain separately visible.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0303 | B4

Source p. 35

Required indicators and calculations

Calculate an improvement percentage as the difference between comparable baseline and assessed results, divided by the baseline result and multiplied by one hundred. A zero or negative baseline shall not be used as the denominator of a percentage reduction claim. Report absolute changes instead and explain any removal accounting.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0304 | B5

Source p. 35

Required indicators and calculations

Calculate physical recycled content by dividing the eligible recycled mass incorporated in the assessed product by the total assessed product material mass. Packaging is excluded from both quantities unless packaging is the assessed product. Fluids included in the defined product mass shall be treated consistently in both numerator and denominator.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0305 | B6

Source p. 35

Required indicators and calculations

For the main life cycle result, use a recycled content allocation approach: incoming secondary material carries collection, sorting and reprocessing burdens needed to deliver usable input, but not the previous product's primary production burden. The current product carries its collection, dismantling and final disposal burdens. Processing that creates usable secondary material for the next product is assigned to that next product. State the transfer point and reconcile upstream datasets to prevent a gap or duplication. Report any alternative allocation as a sensitivity result, not a replacement selected for favourability.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0306 | B7

Source p. 36

Required indicators and calculations

Screen the complete inventory before cutoffs. No legal, hazardous, critical material or known significant impact may be omitted because of low mass. The detailed product inventory shall identify at least 98 percent of product mass and 95 percent of estimated gross climate impact. Each omitted detail shall contribute less than one percent of screened gross climate impact; aggregate omitted detail shall not exceed five percent. The best estimate for the remainder shall still be included as a separately identified subtotal in the reported footprint. These draft coverage rules permit incomplete detail, not zero burden for unknown inputs.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0307 | B8

Source p. 36

Required indicators and calculations

Facility energy evidence shall reconcile all purchased and self generated energy. At least 90 percent of total annual final energy, converted consistently to MJ, shall be supported by meters or traceable commercial measurements. The remainder shall be estimated and disclosed. Failure to meet this pilot minimum blocks a full facility energy verification, while a clearly restricted statement may identify the verified subset.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0308 | B9

Source p. 36

Required indicators and calculations

Primary data coverage for product climate results shall be estimated on an emissions weighted basis using gross positive contributions. Each process contribution shall be multiplied by the evidenced primary share of its underlying activity data; the resulting contributions shall be divided by the total gross positive contribution. Supplier aggregates with unknown underlying coverage shall not be assigned 100 percent primary coverage. Removals and credits shall not increase this percentage.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0309 | B10

Source p. 36

Required indicators and calculations

Data shall normally describe the assessed twelve month production period. Older process or secondary data may be used when representativeness is justified and more representative data are unavailable. Data age alone shall not be treated as proof of poor or good quality. Known changes in technology, electricity mix or sourcing shall trigger review regardless of age.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0310 | B11

Source p. 36

Required indicators and calculations

Circularity indicators shall distinguish input, use and output stages. Calculate collection rate from the collected quantity and the eligible end of life quantity in the same market and period; estimates of products reaching end of life shall be explained. Calculate a reuse or remanufacturing share only for a defined eligible input stream and a verified return to an identified function. Units by count and units by mass shall not be combined.

RESULT

Select result

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0311 | B12

Source p. 36

Required indicators and calculations

Service life extension claims shall compare equivalent functions and distinguish observed additional service from predicted extension. Virgin material intensity shall use the same product or service unit across periods and shall be accompanied by the absolute virgin input total. Improved intensity during increased production shall not be described as an absolute resource reduction without supporting totals.

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

Annex J | Evidence sampling and action records

CHECK 0394 | J1

Source p. 44

Evidence sampling and action records

Each assessment shall combine document review, interviews, direct observation and other relevant corroboration. For worker and community issues, information obtained solely from management shall be insufficient where independent affected party evidence can be obtained safely. Physical test rules in Annex D do not replace social or governance evidence.

RESULT	Select result	FINDING / ACTION ID	
EVIDENCE / OBSERVED RESULT / N/A RATIONALE			

CHECK 0395 | J2

Source p. 44

Evidence sampling and action records

The assessor shall select interviews and records independently. The sampling plan shall consider sites, shifts, gender where lawfully available, agency and migrant status, occupations, recruitment channels and known risks. It shall explain adequacy and limitations; there is no single universal interview count for every workforce.

RESULT	Select result	FINDING / ACTION ID	
EVIDENCE / OBSERVED RESULT / N/A RATIONALE			

CHECK 0396 | J3

Source p. 44

Evidence sampling and action records

Worker interviews shall be confidential, voluntary, conducted without supervisors present and supported by an independent interpreter where needed. Interview arrangements shall avoid exposing participants to retaliation. Information shall be corroborated while respecting the safety of individuals; public reports shall not contain identifiable interview accounts without appropriate consent and protection.

RESULT	Select result	FINDING / ACTION ID	
EVIDENCE / OBSERVED RESULT / N/A RATIONALE			

CHECK 0397 | J4

Source p. 44-45

Evidence sampling and action records

Payroll and time review shall cover at least three distinct months in the assessed twelve month period, including the month with the highest identified overtime or recruitment risk. Where the operation is younger, review all available months and disclose that limitation. Sampling shall be extended when records conflict or a pattern of abuse is indicated. This is an IAF draft audit minimum, not a universal statistical confidence claim.

RESULT	Select result	FINDING / ACTION ID	
EVIDENCE / OBSERVED RESULT / N/A RATIONALE			

Requirements & evidence

CHECK 0398 | J5

Source p. 45

Evidence sampling and action records

Evidence shall be triangulated across contracts, hours, pay, production schedules, recruitment records and confidential worker input. Personal documents shall be inspected only as necessary and lawfully permitted; unnecessary copies shall not be retained. Refusal of unnecessary collection shall not be treated as noncooperation.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0399 | J6

Source p. 45

Evidence sampling and action records

For communities and sourcing, evidence may include affected party accounts, environmental measurements, lawful land records, grievance outcomes, traceability documents and credible independent information. The assessor shall distinguish direct observation, third party reports, allegations and confirmed findings.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0400 | J7

Source p. 45

Evidence sampling and action records

The materiality and action record shall contain the issue; affected people or ecosystem; value chain location; cause contribution or linkage; actual or potential impact; severity and likelihood; evidence quality; required control; action owner; funded resources; due date; interim protection; outcome measure; and effectiveness review. Serious impacts shall not be downgraded because remedial action is expensive.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0401 | J8

Source p. 45

Evidence sampling and action records

Action closure shall identify who verified effectiveness and the evidence used. A policy update or supplier promise alone shall not close a finding concerning actual unpaid wages, harmful discharge, unsafe equipment or continuing retaliation. Correction of the immediate effect and prevention of recurrence shall both be considered.

RESULT **FINDING / ACTION ID**

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

Requirements & evidence

CHECK 0402 | J9

Source p. 45

Evidence sampling and action records

Assessors shall include competence relevant to labour, human rights, environmental science, automotive processes, governance and data assurance according to scope. A laboratory qualification alone shall not qualify a person to verify worker rights. The team may use specialists, while retaining an accountable lead and independent decision review.

RESULT

FINDING / ACTION ID

EVIDENCE / OBSERVED RESULT / N/A RATIONALE

CHECK 0403 | J10

Source p. 45

Evidence sampling and action records

Evidence retention shall protect sensitive personal information through minimization, controlled access and appropriate deletion rules. Long term retention of the assessment conclusion does not require retaining every personal record. A protected evidence index or anonymized finding may support traceability where full personal data retention would be unnecessary or unlawful.

RESULT

FINDING / ACTION ID
